### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Independent claims 1 and 10 have been amended to now recite, in essence, that the digital value, e.g. mathematical output data, and its status bits, e.g. jump flags, are stored at the same address location. This new limitation combined with the previous limitation of resolving the conditional jump instruction prior to reaching the arithmetic logic stage make the claims allowable. Prior art searched and found teach storing jump flags in the eFlags or Flags register(s) and the mathematical output data in another location, thereby having different address locations for the status bits and digital values. Also, most of the prior art teaches resolving the conditional jump instruction during the arithmetic logic stage of a pipeline instead of the prior to the stage. The prior art that did teach resolving the conditional jump instruction before the arithmetic logic stage did not teach storing the status bit(s) at the same addressable location as the digital value and then reading the digital value and the status bit(s) from this single location to resolve the conditional jump instruction.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
